Blue Health Intelligence (BHI) Launches Its Advanced Analytics Platform, Population Advyzer; Debuts at RISE Nashville

*BHI's **Population Advyzer Suite** is an advanced analytics platform with three distinct and flexible modules—Care Management, Exchanges, Medicare Advantage—that help health plans uncover and target the most impactful opportunities.*

Chicago, IL (March 6, 2017)—Blue Health Intelligence (BHI) announced today its launch of Population Advyzer. This advanced analytics platform was specifically designed to address health plans' and provider's population health and financial management needs. Population Advyzer includes predictive models along with workflow management and operational tools, which are important for ACA Commercial, Medicare Advantage, ACOs, and health plans' entire book of business.

“BHI helps health plans and providers optimize their care management strategies and risk adjustment ROI, says BHI's CEO Swati Abbott. “With our Population Advyzer Suite, health plans can finally adopt a truly member-centric approach with full visibility into their data.”

BHI's Population Advyzer Suite includes transparent technology to identify coding and quality gaps while providing a full and accurate understanding of member health, including their risk of high-cost health events. Population Advyzer offers an extensive solution with three distinct and flexible modules:

- Exchanges – Increases risk adjustment ROI for health plans with analytics and workflow management tools
- Medicare Advantage – Improves ROI on risk-adjusted payments
- Care Management – Improves financial and health outcomes for health plans, providers, and members

BHI at RISE Nashville

Roxanna Cross, BHI's Senior Director of Product Management, will be hosting a key roundtable discussion featuring Population Advyzer's Exchanges Module on Tuesday, March 7, 2017, from 4:30-5:30 p.m. at the 11th Annual RISE Nashville Summit. RISE Nashville is the healthcare industry's premier event addressing risk adjustment, Stars, quality management, financial compliance, performance analytics, and engagement strategies.

The discussion will feature the Population Advyzer's Exchanges Module and include best practices for accurate identification and capture of population risk. Cross will review fostering good communications between the plan, providers, and members with full transparency to inform accuracy and efficiency that yields:

- Actionable insights
- Reliable interventions with the right providers
- Operational efficiencies
- Gaps in quality and care
