

## QUALITY MEASUREMENT ENGINE

Quickly identify and prioritize quality improvement opportunities

Millions of Americans receive wasteful or inadequate medical care each year, harming patients and costing hundreds of billions of dollars. Blue Health Intelligence® (BHI®) developed CarePulse to help Plans, employers, and benefit brokers/consultants uncover and prioritize care and quality improvement opportunities to ensure the most appropriate and cost-efficient care.

**BHI'S DIFFERENTIATED VALUE EQUATION:**  
**Nationally Recognized Standards + Custom Measures + Transparent Methodologies = The Most FLEXIBLE Quality Measurement Tool**

### An Essential Tool

CarePulse flags individuals and populations who have experienced or are at risk for gaps in care by applying nationally established and customized clinical rules measures, including preventive, episode-specific, and low-value care measures. CarePulse can also produce quality metrics at the provider or practice level. CarePulse offers more than 350 measures including those designated by nationally-recognized bodies as well as your organization's custom measures. Analysis of member, group, or provider/practice quality can be performed retrospectively to close existing gaps or prospectively to identify risks of potential gaps in care and adverse outcomes.

Use CarePulse to:

Understand the prevalence of low-value care in a population to reduce waste

Increase physician adherence to national standards and improve care quality

Design high-performing provider networks that maximize care quality and delivery

Help care managers better target interventions for maximum impact

Engage in value-based care arrangements that provide reliable quality care

### \* THE POWER OF BHI DATA

**217M+** UNIQUE MEMBERS AND GROWING  
REFRESHED MONTHLY

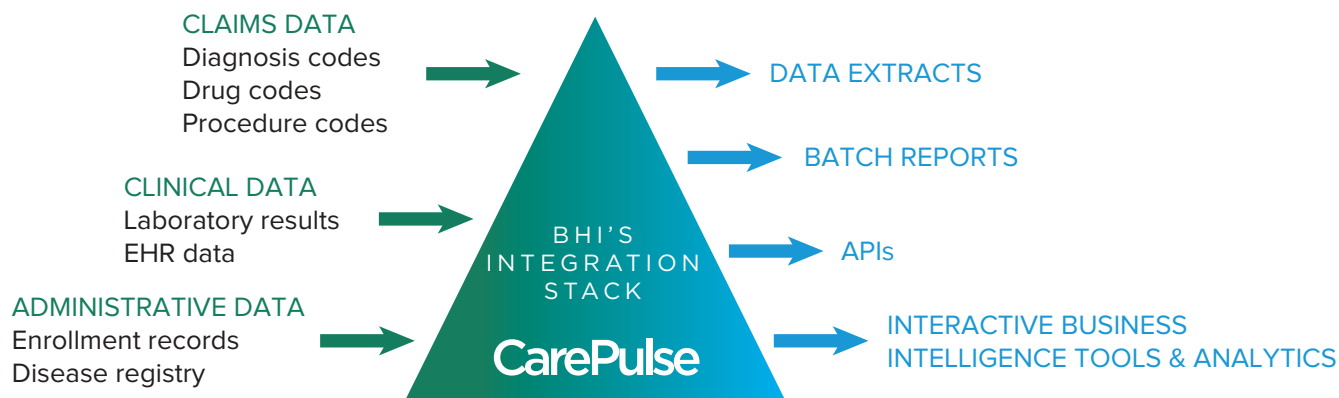

**19B** CLAIMS AND CLIMBING  
COVERAGE FOR EVERY 3-DIGIT ZIP CODE IN THE U.S.

**12+** YEARS OF HISTORIC DATA  
CONFORMED UNIFORMLY

## EASILY SHARED AND INTEGRATED OUTPUTS

BHI integrates multiple sources of data into a single source of truth. Plans submit multiple data types to BHI. BHI uses CarePulse and other proprietary methodologies to interpret and analyze the data. Results can be exported as a flat file or data store and used in their entirety.

**CarePulse**  
QUALITY MEASUREMENT

### CAREPULSE AT WORK: HELPING TO ENSURE QUALITY CARE FOR AMERICAN VETERANS

TriWest Healthcare Alliance® (TriWest) is using CarePulse to ensure healthcare providers in the Veterans Affairs' Community Care Network (CCN) achieve quality and access-to-care goals. Each CCN provider is proactively monitored on key safety and quality indicators using a wide array of metrics. CarePulse's fully transparent healthcare analytics allow TriWest and members of its provider network to find care gaps and highlight improvement opportunities. TriWest reviews performance in coordination with VA representatives to help ensure the CCN provider networks meet Veterans' needs for high-quality care. Resulting metrics also identify providers who are eligible to join a high-performing network within the CCN.

### IS YOUR CURRENT QUALITY MEASUREMENT TOOL ACCURATE, TRANSPARENT, AND CREDIBLE?
